- Subtraction

Year 1 continued..

Concrete

Pictorial

Abstract

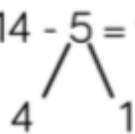

Making 10 using ten frames.
14- 5

Children to present the tens frame pictorially and discuss what they did to make 10.

Children to show how they can make 10 by partitioning the subtrahend.

$$14 - 5 = 9$$

$$14 - 4 = 10$$

$$10 - 1 = 9$$

Finding the difference (using cubes, Numicon or Cuisenaire rods, other objects can also be used).

Calculate the difference between 8 and 5.

Children to draw the cubes/other concrete objects which they have used to illustrate what they need to calculate.

Find the difference between 8 and 5.
8- 5, the difference is ____

Children to explore why $9-6 = 8-5 = 7-4$ have the same difference.

- Subtraction

Yr Grp & Vocabulary

Year 2

Vocabulary:

Subtraction, subtract, take away, difference, difference between, minus
Tens, ones, partition
Near multiple of 10, tens boundary
Less than, one less, two less... ten less... one hundred less

Concrete

Use partitioning of tens and ones to subtract a 2 digit number from another 2 digit number with no regrouping involved.

$$\begin{aligned} 37 - 12 &= \\ 37 - 10 &= 27 \\ 27 - 2 &= 25 \end{aligned}$$

Column method using base 10.
48-7

Pictorial

Children to present the 2 digit number using a pictorial image.

$$37 - 12 \text{ (subtract 10, subtract 2)} = 25$$

Children to represent the base 10 pictorially where no renaming is required

Abstract

Children to use a number line to show partitioning of the 2 digit number 10 and 2, then to subtract this from 37 separately.

$$37 - 12 =$$

Children to use the expanded form of column subtraction.

$$\begin{array}{r|l} \text{T} & \text{O} \\ \hline 40 & 8 \\ - & 7 \\ \hline 40 & 1 = 41 \end{array}$$

- Subtraction

Discovery Schools
Academy Trust

Year 2
continued...

Concrete

Column method using base 10 and having to rename.

41-26

Pictorial

Represent the base 10 pictorially, remembering to show the renaming.

Abstract

Expanded column method

$$\begin{array}{r|l} \text{T} & \text{O} \\ \hline & \\ \text{30} & \\ \text{40} & 11 \\ - 20 & 6 \\ \hline 10 & 5 = 15 \end{array}$$

- Subtraction

Pictorial

Abstract

Year 6

Vocabulary:

divide, divided by,
divisible by, divided into
share between, groups of
factor, factor pair,
multiple
times as (big, long, wide
...etc)
equals, remainder,
quotient, divisor
inverse

We can't group 2 thousands into groups of 12 so exchange them.

We can group 24 hundreds into groups of 12 which leaves 1 hundred.

After exchanging the hundred, we have 14 tens. We can group 12 tens into a group of 12, which leaves 2 tens.

After exchanging the 2 tens, we have 24 ones. We can group 24 ones into 2 groups of 12, which leaves no remainder.

Children should write a list of key facts before calculating.
